

APPRECIATION FROM THE GOVERNMENT FOR FIRE MANAGEMENT

A certificate received from Labuhan Batu district forestry department for the participation to extinguish the fire in protected forest in Panai Tengah sub-district on 11th to 17th August 2019.

The AEP Group has implemented "Zero Burning Policy" since August 2012 which confirms the company's commitment to the prevention and control of forest and land fires (Karhutla).

This commitment is reaffirmed in the AEP Group Sustainability Policy which issued on February 2019.

In carrying out our sustainable business practices, we conducted zero burning policy toward land clearing, replanting or other development.

Other than that, we also actively conducted the Fire and smoke mitigation management in our plantation and surrounding areas.

Zero Burning Policy

A Prolonged drought weather has had a significant impact on the occurrence of forest and land fires in Indonesia. Understanding the enormous impact of the situation, the company are working to strengthen the organization which serves as the means of emergency response to land fires.

This conduct aims to improve the prevention programs in the forest and land fire prevention.

The company also actively collaborate with the community and related stakeholders in mitigating program. The company also regularly apply regular evaluations and improvements to the implemented systems and programs to ensure the best performance toward zero burning policies implementation.

The documentation of emergency response toward the fire in protected forest located in the sub-district of Panai Tengah in August 2019. The fire team from PT. Hijau Pryan perdana (a member of AEP group) in collaboration with Government Agency.
