

PT. TASIK RAJA

IN COLLABORATION WITH STAKEHOLDERS TO REDUCE NEGATIVE ENVIRONMENTAL

Bukit Tujuh Village, South Labuhan Batu Regency, North Sumatra

A RECENT SUCCESS

PT. Tasik Raja collaborates with KIS Group Sustainability for the implementation of the CDM (Clean Development Mechanism) project. This was welcomed by the surrounding community and also other stakeholders (Villages heads, Hamlet heads, BLH, journalists, etc.).

Collaboration between the company and stakeholders will have a positive impact on the environment.

CDM (CLEAN DEVELOPMENT MECHANISM)

This project is a commitment to PT. Tasik Raja to reduce greenhouse gas emission levels to safe limits and create a clean environment, free from air pollution. Greenhouse Gas Emissions Reduction is carried out by utilizing waste to become energy in palm oil mills. This is part of PT Tasik Raja's efforts to map the potential of renewable energy sources from Palm Oil Mill Waste and also to be in line with the government policy to reduce greenhouse gas emissions.

PT. Tasik Raja may obtain other indirect benefits such as: technology transfer, improvement of human resources and environmental quality, and agility to compete.
