

## **Commitment to no planting on peat of any depth (New Development)**

### **PT. Cahaya Pelita Andhika**

In June 2019, in line with our commitment to responsible palm oil production, AEP made the landmark decision to stop new development on peatland.

One example of our commitment to the implementation of no planting on peatlands is at PT. Cahaya Pelita Andhika, which is 163 hectares in the location permit, no new development on the peatland.

Since the issuance of the AEP Sustainability Policy in June 2019, one of which is a commitment to NDPE, the AEP location permit has not carried out new development on peatlands.

The areas with peatlands are as follows:

- PT. Cahaya Pelita Andhika (*ISPO certified by the Mutuagung Lestari Certification Body*)
- PT. Hijau Pryan Perdana (*ISPO certified by the Mutuagung Lestari Certification Body*)
- PT. Anak Tasik (*ISPO certified by the Mutuagung Lestari Certification Body*)
